

OURA

PRE-IPO / SEPTEMBER 2026

IPO Financial Report

The ring. The subscription. The offer.

Deal structure, unit economics, financials and risk.

NASDAQ: OURA

INDICATIVE PRICE: \$40-\$44

50M SHARES

DEAL SNAPSHOT

Headline metrics, offer structure and investor interest

5.0M PAID MEMBERS	\$1.425B REVENUE	74% YOY REVENUE GROWTH
65% DAU / MAU	85% 12-MO PAID RETENTION	\$59M NET INCOME

OFFER TERMS

13.5M primary shares sold by Oura within a 50M-share offering.

Indicative IPO price: \$40-\$44 per share.

Ticker: OURA (Nasdaq).

Up to 7.5% of shares reserved for individuals and entities identified by management.

Underwriters may purchase up to an additional 7.5M shares from selling stockholders.

CORNERSTONE INTEREST

Eli Lilly indicated interest in up to \$100M of common stock.

Funds affiliated with Dragoneer Investment Group indicated interest in up to \$300M.

If cornerstone investors purchase shares, the number available to the general public is reduced accordingly.

MARKET BACKDROP

The Future of Health estimates that promoting health spend exceeded \$1 trillion in 2023 and will surpass \$2 trillion by 2030.

COMPANY OVERVIEW

From Finnish sleep tracker to always-on health intelligence platform

MISSION

Our mission is to empower people to live healthier, longer. Oura is positioned as an always-on health intelligence platform designed to help people understand and manage their health in everyday life.

FOUNDING & HISTORY

2013	Founded in Oulu, Finland, by Petteri Lahtela, Kari Kivela and Markku Koskela; early product emerged from a Kickstarter project.
2015	First seed round of \$2.3M, led by Lifeline Ventures.
2023-24	Acquired Proxy Inc., Sparta Science and Veri, expanding into digital identity, enterprise health analytics and metabolic health.
Oct. 2025	Series E of roughly \$875-\$900M led by Fidelity, valuing Oura at about \$11B; paired with a \$250M credit facility from JPMorgan and Goldman Sachs.
May 2026	Confidential IPO filing with the SEC.
Sep. 2026	IPO terms set at \$40-\$44/share, targeting roughly \$12.8-\$14.1B valuation; expected Nasdaq listing week of Sep. 28, 2026.

WHERE THE COMPANY IS TODAY

Oura is now headquartered in San Francisco while retaining a significant R&D presence in Finland, with more than 900 employees in total.

Its core and only hardware product is the Oura Ring, a finger-worn biometric tracker.

PRODUCT THESIS

The central product thesis is that the finger provides a stronger, cleaner physiological signal than the wrist because of arterial proximity. This is Oura's primary technical differentiation versus wrist-based wearables.

03

PRODUCT & PLATFORM

Accuracy, engagement and the data layer behind the ring

Oura Ring is purpose-built to leverage the finger's unique physiological advantages for PPG measurement, producing a stronger signal than wrist-based wearables.

SLEEP ACCURACY

PLATFORM AT A GLANCE

- 50+ algorithms & models
- 41.8B hours of data
- 65% DAU / MAU
- Secure, scalable and private infrastructure

PRODUCT LINE & REACH

- Ring generations have iterated from Ring 3 to Ring 4 to Ring 5 (launched June 2026), with improvements in accuracy, battery life and form factor.
- Ring 5 is thinner than Ring 4, offers an optional charging case and introduces GLP-1 medication tracking.
- Cumulative unit sales rose from roughly 2.5M rings by Dec. 2024 to about 5.5M by Sep. 2025.
- Distribution spans direct-to-consumer, roughly 8,400 retail doors and institutional / employer-healthcare channels across 56 markets.

04

BUSINESS MODEL

Hardware acquisition + recurring membership economics

CORE MECHANIC

Oura uses a two-part "razor and blades" model: a one-time ring purchase paired with a recurring membership for the bulk of the app's health insights. The subscription layer is the key source of revenue durability.

HARDWARE

MEMBERSHIP

\$300-\$400

Historical ring price range, depending on model and finish.

\$5.99/mo

Starting membership price for full health insights.

OPERATING METRICS

METRIC	VALUE	CONTEXT
Paid members	5M as of Jun. 30, 2026	+100% YoY
12-month retention	~85%	Weighted average paid-member retention
Distribution	D2C + ~8,400 retail doors	Plus institutional / employer-healthcare
Geographic reach	56 markets	Worldwide
Average revenue / ring	\$311	9M FY2026

LEADERSHIP

Tom Hale serves as CEO. In public comments cited in the source report, he indicated Oura could approach roughly \$2B in sales for 2026. The founding team originated the product and technology in Finland.

OWNERSHIP STRUCTURE

Of the 50M shares being offered, 13.5M are primary and 36.5M are secondary. That means most IPO proceeds go to existing shareholders rather than directly to Oura's balance sheet.

05

FINANCIALS

Revenue mix, member scaling and what the subscription flywheel is showing

Revenue mix

Membership revenue grew 121% YoY vs. 65% for hardware.

Members vs. unit sales

Member base is scaling faster than hardware unit sales.

MIX SHIFT

Membership revenue grew 121% YoY versus 65% for hardware in the 9M comparison. Hardware still represents about 80% of total revenue, so Oura remains meaningfully a hardware company by revenue mix today.

INSTALLED-BASE EFFECT

Paid members increased from 2.5M to 5.0M over the nine-month comparison while Rings Sold rose from 1.8M to 3.1M. The report flags this as a sign that more growth is coming from the installed base converting to or maintaining paid membership.

MARKET SHARE CONTEXT

Oura represented approximately 2% of global wearable shipments (212M units) in the 12 months to June 30, 2026, with 3.6M rings sold over that period.

WHAT THE SPLIT MEANS

- 13.5M primary shares (~27%) are company-issued.
- 36.5M secondary shares (~73%) are sold by existing shareholders.
- The large majority of IPO proceeds therefore goes to early investors and insiders rather than Oura's balance sheet.
- Notable backers named in the source report include Forerunner Ventures, Lifeline Ventures and Fidelity Management & Research.

OFFER MECHANICS

RESERVED ALLOCATION

At Oura's request, underwriters reserved up to 7.5% of the shares in the prospectus for certain individuals and entities identified by management.

OVER-ALLOTMENT

Underwriters have an option to purchase up to an additional 7.5M shares from selling stockholders, less underwriting discounts and commissions.

OPEN ITEMS TO CONFIRM DIRECTLY FROM THE S-1

- Whether Oura will list with a dual-class share structure that concentrates voting control with founders / early investors.
- The standard post-IPO lock-up period for insiders (commonly 180 days).
- The precise cap-table breakdown by shareholder.

CORNERSTONE INVESTORS

Eli Lilly and Dragoneer together indicated interest in roughly \$400M of the offering. Their participation would reduce the number of shares available to the general public.

GROWTH DRIVERS

- GLP-1 tracking feature
- Enterprise / employer channel
- International expansion
- Retail footprint
- Olympics 2029 / sports partnerships
- Possible new hardware categories
- AI

RISKS & THREATS

- Pending class-action lawsuit
- Regulatory risk
- Hardware commoditization
- Key-person risk
- Reliance on continued VC / insider selling
- Macro IPO-market risk

COMPETITIVE LANDSCAPE

Samsung Galaxy Ring

Whoop

Apple Watch

Garmin

Fitbit

IPO MECHANICS & TIMING

- Nasdaq ticker: OURA.
- Indicative price range: \$40-\$44/share.
- Expected pricing / listing window: week of September 28, 2026.
- Bookrunners and precise allocation dynamics should be confirmed against the final prospectus.

READER NOTE

08

CONCLUSION

A fast-growing health platform still transitioning from hardware-led revenue to a more recurring model

BOTTOM LINE

Oura reaches the IPO market with rapid growth, strong member engagement and a recurring membership layer that is scaling faster than the hardware business.

In the 9M FY2026 comparison, total revenue grew 74% year over year, paid members reached 5M and membership revenue rose 121% year over year. That mix shift is important because hardware still represents roughly 80% of revenue today: the quality of the public-market story will depend in part on whether recurring membership revenue continues to gain weight.

The offer structure is equally important. Roughly 73% of the shares offered are secondary, so most IPO proceeds go to existing shareholders rather than Oura itself. The final valuation, governance structure, lock-up terms, regulatory execution and competitive pressure therefore remain the main items to confirm around pricing and after listing.
